

LIFETIME WARRANTY

Performance tested and American made, Attic Breeze solar attic fans are engineered for a lifetime of performance and durability. With its all metal zincalume alloy construction, impact resistant monocrystalline solar panel, and UltraFlö® design technology, Attic Breeze manufactures the highest quality solar attic fans available. We stand behind our workmanship and commitment to quality by offering an industry leading Lifetime Warranty on all of our residential solar attic fan models.

HIGHEST PERFORMANCE ON THE MARKET

Our proprietary UltraFlö® design technology maximizes airflow production, offering the highest conversion efficiency (cfm/watt) of any solar powered ventilation product available.

POWER	PERFORMANCE	COVERAGE AREA*
25 Watts	1550 CFM	up to 2500 sqft
35 Watts	1775 CFM	up to 2850 sqft
45 Watts	1925 CFM	up to 3100 sqft
65 Watts	2150 CFM	up to 3450 sqft

*Proper sizing depends on a variety of factors including roof pitch, attic area, architecture, roof color, as well as the specific ventilation application. Please visit our website at www.atticbreeze.net for additional information or contact your local Authorized Attic Breeze Dealer for assistance.

STOCK COLOR OPTIONS

Jet Black Bronze Brown Weathered Gray Polar White Terra Cotta Hickory Shakedown

CUSTOM COLOR OPTIONS

Note: Color samples are intended for color reference only as colors in the printing process of this collateral may vary from the actual product.

WE DON'T JUST RAISE THE BAR WE ARE THE BAR

Breeze Mate®

SOLAR VENTILATION SYSTEM

The optional Breeze Mate® solar ventilation system combines our UltraFlö® ventilation technology and proprietary control system design to give you the most intelligent solar powered ventilation solution ever created. Breeze Mate puts ventilation control in your hands, allowing full control over fan operation and other performance related features. It is easy to install and configure using our wireless network technology. Whether used for residential or commercial applications, there is a Breeze Mate control solution for all of your ventilation needs.

- ✿ Adjustable temperature & humidity control
- ✿ Ultra sensitive pressure sensing technology
- ✿ Displays power output and fan operation
- ✿ Allows for either manual or automatic fan control
- ✿ Controls up to 10 fans wirelessly

BETTER PARTS BETTER PERFORMANCE BETTER PRODUCTS

WE ARE SOLAR POWERED VENTILATION

Attic Breeze believes continuous improvement and a commitment to excellence is what makes a best-in-class product. With Attic Breeze you always have more options, better standard features, and the highest performance of any solar attic fan available on the market. With Attic Breeze you always receive more!

FEATURES

- ✿ Available in 25, 35, 45 and 65 watt models for both residential and commercial applications
- ✿ Thermal switch and fire safety switch included in all models at no additional cost
- ✿ Integrated, adjustable solar panel bracket
- ✿ Corrosion resistant zincalume alloy construction with stainless steel hardware and brackets
- ✿ Commercial grade, monocrystalline solar panel with impact resistant tempered glass
- ✿ Dynamically balanced 14", 5-wing aluminum fan blade for high performance and whisper quiet operation
- ✿ Engineered with UltraFlō® design technology for maximum airflow production
- ✿ Manufactured with the latest generation of high efficiency solar cells for powerful performance
- ✿ Both Florida & Texas windstorm certified for use in hurricane wind zone areas
- ✿ AAMA 2604 Compliant, Series 38 Super Durable powder coated finish available in a variety of stock and custom color options
- ✿ Comes standard with pre-drilled mounting holes and installation kit
- ✿ Made in the USA with a LIFETIME WARRANTY

THE IDEAL VENTILATION SOLUTION

As the sun relentlessly beats down on your home throughout the day, heat can quickly build up in your attic from trapped hot attic air and inadequate ventilation. This excessive attic heat directly impacts both your electric bills and the performance of the HVAC equipment that cools your home. Attic Breeze solar attic fans offer the ideal solution to this problem by using the same energy from the sun to continuously ventilate trapped hot air and cool your attic. The result is a more comfortable home that requires less energy to cool.

HOW DOES IT WORK?

#2

Hot attic air is displaced by cooler, ambient air drawn in from the intake ventilation.

#1

Attic Breeze® actively removes hot attic air and humidity keeping the attic cooler & drier.

#3

The less heat there is in the attic, the less heat there is in the home resulting in a HVAC system that works less saving both energy and money.
